Industrial/Research Orientated Project (EEEE4055) - SEM Survey

School/Department:	Electrical and Electronic Eng/-
Lecturer Name:	Belle Ooi Pei Cheng
Module Name:	Industrial/Research Orientated Project
Module Code:	EEEE4055
Type of Survey:	SEM
Year Delivered:	2025/2026
Semester Delivered:	Full Year Malaysia
Survey Dates:	06 Apr 2026 00:00 - 30 Apr 2026 23:00
Survey Status:	Closed
Student Completion Rate:	53.57%
Student Responses:	15 out of 28 students responded

Results

	Q1	Q2	Q3	Q4	Q5	Q6	Q7	AggSc	Agg%
Average Scores for This Survey	4.67	4.40	4.20	4.47	4.20	4.13	4.20	30.27	83.1%
Average Scores for all SEM Surveys (2025/2026)	4.24	4.20	4.18	4.13	4.12	4.15	4.18	29.20	79.3%

Questions

1) The module has provided me with opportunities to explore ideas or concepts in depth.
2) The module has challenged me to deliver my best work.
3) The module has been well organised and has been running smoothly.
4) The resources in Moodle for this module have helped me to complete my work.
5) The criteria used in marking my work have been made clear to me.
6) The workload on this module was reasonable for the number of credits.
7) Overall, I am satisfied with this module.
8) Please use the space below for any constructive comments about this module.

Possible Responses

5) Strongly Agree
4) Agree
3) Neutral
2) Disagree
1) Strongly Disagree

Higher Scores are more favourable

3	3	3	3	3	3	3	
4	5	3	4	3	3	2	Let's have a deep talk here before I graduate, that's the only time I am really feeling like say something, I don't like to complain when it is just the beginning, so I decided to say something after four years of hardwork and experience. I am happy to learn with all the professional lecturers here. I know this situation might not be solvable, but I still choose to express my feelings towards the department. I understand that the choices of Final Year Project topics are heavily depends on current available lecturers' specialized area. However, over the four years in UNM, I feel like I missed out a huge part of EEE, and I still have a lot to explore in this industry, which are not introduced by our department. I understand this is common for every University that the modules and FYP they offer is depends on current lecturers' specialized area. I feel like I still need to take time to search out the exact field I really passionate, I love EEE, but I still finding that specific industry. I had an exchange to UoN UK, I feel like the choice of modules is a big universe, everyone can choose whatever they want, they can do research before choosing it. However, UNM feels like limited by BEM, all those compulsory modules, together with limited lecturers, making students don't have the chance to explore freely. Sounds like complaining, but I still hope one day, maybe it takes years, decades or even centuries, there will be a solution that students can be introduced with more diversed aspect within EEE, so that they can actually know what they really like in EEE, creating a more diversed student engineering world in Malaysia. Thank you for the support provided by every lecturers, I love yall and see yall.
4	5	3	5	5	5	4	Has some ups and downs in my fyp process, but overall well done me and department!
4	4	4	5	4	4	4	That's good when deadlines extended
